# Activity

The image shows a code editor interface with two files open:

- main4b.html**:  
A file located at `Users > justine > main4b.html`. It contains an HTML document structure with an `<h1>` header and five `<p>` paragraphs. The fifth paragraph (`p5`) has a class of "odd". Lines 9 through 13 show a comment block with three options: 1. Inline, 2. Internal, and 3. External.
- style.css**:  
A file located at `Users > justine > style.css`. It contains CSS rules for the `body`, `h1`, and five `p` elements (`p1` through `p5`). The `body` has a black background color. The `h1` has a light blue color. The `p` elements have different colors: `p1` is sandy brown, `p2` is light coral, `p3` is sandy brown, `p4` is light coral, and `p5` is sandy brown.
